CHILDREN'S PLAY SPACE AUDIT 2010

Development Planning-Bridgend
County Borough Council, Civic Offices
Angel Street, Bridgend, CF31 4WB
Telephone: 01656 643670

Summary of Findings

Bridgend County Borough covers an area of approximately 25,500 hectares, with a population, at 2009, of approximately 134,200. The audit of Children's Playing Space reveals that there is an approximate total of 69.14 hectares of land available for recreational activities. This represents on a County Borough wide basis (and based on the minimum FIT standard of 0.8 hectares per 1000 population), an overall **deficiency** in Children's Playing Space of approximately **38.22 hectares**.

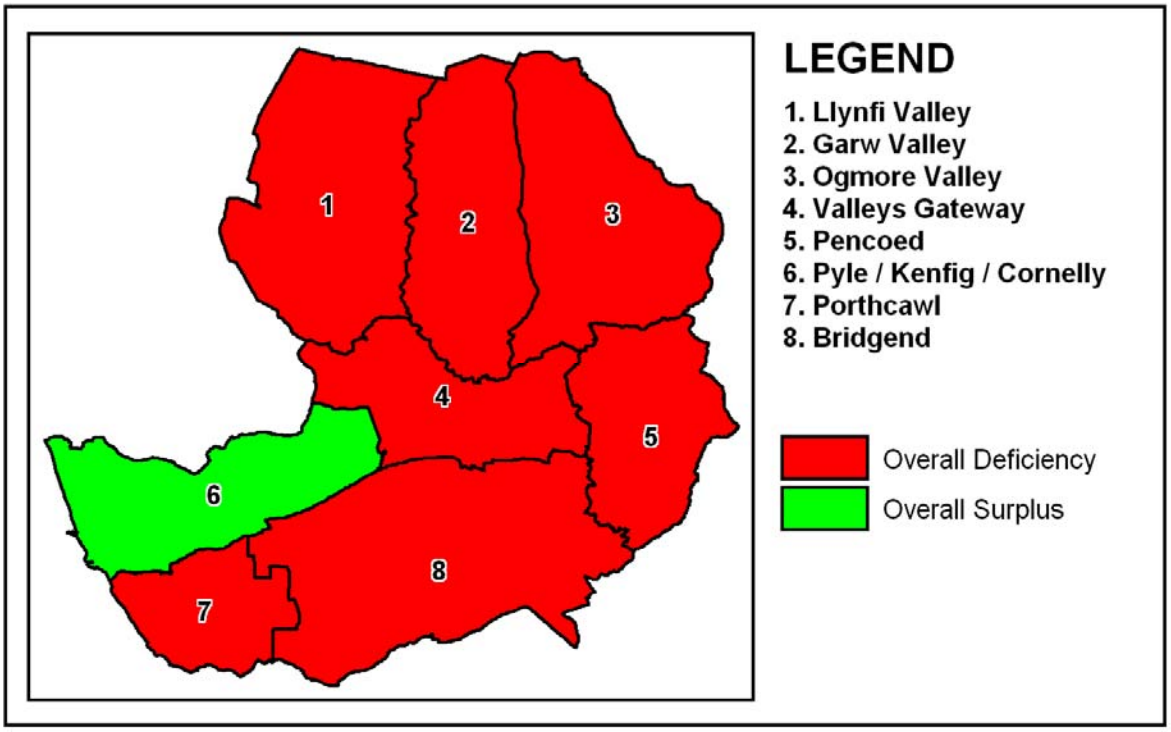
The sub-area/settlement analysis enclosed in this document is however based on the 2001 census population, due to the detail available at the local level.

In geographical terms, the areas of greatest deficiency in Children's Playing Space are the large urban centres of Bridgend, Maesteg, and Pencoed. Porthcawl and much of the Ogmore, Garw and Llynfi Valleys also illustrate a significant deficiency in provision.

The only areas with a surplus of Children's Playing Space provision are the group settlement area of Tondu/Coytrahen in the Valleys Gateway Sub-area and all of the Pyle/Kenfig/Cornelly Sub-Area, are the only areas with a surplus of. In neither area, however, is there a particular excess of provision.

The 8 Sub-Areas and 13 grouped settlements (GSA's) are illustrated in terms of deficiency and surplus by the maps below (based on the minimum FIT standard of 0.8 hectares per 1000 population):-

Surplus/Deficiency by Sub-Area



Surplus/Deficiency by Grouped Settlement

Background

Planning Policy Wales (PPW) requires local authorities to provide a framework for well located sport, recreation and leisure facilities. The objective of PPW can only by achieved by undertaking local assessments of need and an audit of existing provision, to form an 'Open Space Assessment', which in turn will be used to inform policies in the Local Development Plan (LDP) and formulate an Open Space Strategy.

The Open Space Assessment needs to address **all** forms of open space, including:-

Parks & Gardens

Natural and semi natural green spaces

Outdoor sport facilities

Allotments

Amenity green space

Provision for children & teenagers

Civic spaces

Water

PPW does not prescribe standards of provision; these should be based upon the findings of the Open Space Assessment, and should be locally generated to include quantitative and qualitative elements and take account of accessibility.

The Fields in Trust (FIT) Standards can however be helpful in assessing standards for **outdoor sport and play**.

Outdoor sport and play is not the same as public open space. It is space that is safely accessible and available to the general public, and of a suitable size and nature for sport, active recreation or children's play. It is a significant component, but not the only form of open space.

The FIT minimum standard for outdoor playing space is 2.4 hectares for 1000 people. This total is broken down as follows:-

Outdoor Sport – 1.6 Hectares

Children's Playing space – 0.8 Hectares.

Introduction

This document comprises an 'audit' of the provision for **'Children's Play'** provision within the County Borough and compares this provision with the FIT advisory standards of between 0.8 hectares per 1000 population.

Children's Playing Space includes:-

(i) Designated areas for children and young people containing a range of facilities and an environment that has been designed to provide focused opportunities for outdoor play;

(ii) Casual or informal playing space within housing areas.

For the purposes of this document, Children's Playing Space has been broken down into three categories, developed locally, as follows:-

a) Playgrounds (PG) – a small area containing recreational equipment, such as swings, slides and see-saws for children to play on.
b) Children's Play (CP) – a small, well overlooked but unequipped, grassed area for small children to pursue recreational activities.
c) Recreational Space (RS) – a larger unequipped, grassed area for slightly older children to kick a ball, run around and cycle on.

This document and its findings will therefore form a **part** of any future Open Space Assessment and Open Space Strategy formulated by the Council. However, in its own right it can be used as a tool for development control purposes, as a means to remedying local deficiencies in Children's Playing Provision and as a means of safeguarding and enhancing existing facilities as appropriate. The findings of this document will provide evidence and justification in seeking future planning obligations from developers where new development increases local need.

Additionally, the Council is currently in the process of producing its Local Development Plan (LDP) which will supersede the UDP as the land-use planning document in Bridgend County Borough. Therefore, this document will also be used to guide future planning policy for the protection of existing, and implementation of new Children's Play Space throughout the County Borough.

The comparison of Children's Playing Space and FIT standards is calculated on a Sub-Area and a Group Settlement Area (GSA) basis within the County Borough. The GSA areas are depicted by Figure 1. The GSA's reflect existing settlement identities and links between them, accessibility and ward definitions within the County Borough. Each of the 13 GSA's identified compare the 2001 census population with the actual provision of Children's Playing Space. This comparison provides an overall assessment which identifies a **deficit** or **surplus** of facilities within each GSA.
