

**Music:** Lively xylophone music plays in the background.

**On-screen visuals:** decorative icons illustrate points made by on-screen text.

**Text on screen:** How can we?

- reduce our contribution to climate change?
- clean our air and water?
- enable wildlife to flourish?
- make towns and cities liveable?
- provide space to grow food?
- weave communities together?

How can we?

We can...

Live green:

- create spaces for relaxation and healthy living
- create community cohesion
- improve property values

Eat local:

- connect the rural economy with urban living
- create apprenticeships

Build the community:

- provide space for sports and recreation
- build neighbourhood hubs in sustainable centres
- build connections with nature

Make connections:

- along waterways

- via green corridors
- using sustainable transport

Green the grey:

- with tree-lined streets and squares
- green roofs and walls
- and the creation of urban oases

Integrate nature and business:

- generate incentives for investment
- provide distinctive and attractive work environments

Sustainably manage water:

- reduce flood risk
- improve water quality
- harvest rainwater

Support country parks:

- for outdoor pursuits and relaxation
- help wildlife to flourish
- create employment opportunities

Manage uplands:

- for agriculture extreme sports and recreation
- for renewable energy generation
- protect our coast through managed retreat for unique habitats and tourism

Invest in green infrastructure.

Invest in green jobs.

Invest in your neighbourhood.

Invest in landscape.
